synopsis

Based on true events yeah, coming to a cinema near you. A set of everyday Nigerian travelers's boarmd the last Flamingo Airways flight scheduled to fly from Lagos to Abuja on a fateful Friday night in 2006. The plane cruised at 30,000 feet, tranquil and on schedule. But like a bolt out of the blue,... show more

WHY THO

- ★ Nollywood is the 3rd biggest film producer in the world but info is poor/scarce.
- ★ No singular credible source for data on Nollywood TV/Movie titles.
- ★ I love data.
- ★ No dedicated online community for Nigerian film fans and other stakeholders
- ★ Existing solutions were unimpressive

Why Django?

- ★ Originally started with Wordpress, then Drupal.
- ★ Hated the overhead
- ★ I didn’t know enough PHP (whoops)
- ★ Advised to try Python: Easy, good for data analytics
- ★ Django Documentation is EXCELLENT.
- ★ Django comes with great but non-compulsory tools like ORM, Auth, Admin

Third Party Tools

- Django AllAuth
- Django Haystack/Elastisearch
- Sorl-Thumbnail & Django SES
- Django Filter
- Django Reversion
- Django Celery

Third Party Admin Tools

- ★ Django Suit
- ★ Google Analytics API & Django HitCount
- ★ Django Redactor
- ★ Django Autocomplete Light
- ★ Django Batch Uploader

API ALL THE THINGS!

- ★ Django Rest Framework
- ★ Convert models to API endpoints easily.
- ★ Takes care of authentication, permissions, responses, and formatting of data
- ★ All without changing your model or views.
- ★ Great for internal use with JS Frameworks like React.

Performance

- ★ Django Debug Toolbar: Track page response time, inspect SQL queries.
- ★ In-built caching tools for templates, queries, data. Integrates with solutions like Memcache.
- ★ Static File Handling: ManifestStaticFileStorage
- ★ Cropped Image caching with Sorl-Thumbnail
- ★ Minification, GZip etc
- ★ Data Focused.

Performance

- ★ In-built query methods like **prefetch_related, Q** & **select_related**

```
crew = Crew.objects.filter(title_id=id) \
                .filter(Q(department__department_name='Directing') | \
                Q(department__department_name='Writing') | \
                Q(department__department_name='Producers')) \
                .prefetch_related(Prefetch('person', to_attr='crew')) \
                .select_related('department')
```

SEO

- Structured Data

```
<span itemprop="genre"><strong>{{ g.genre_name }}</strong></span>
```

- Django Flatpages and Sitemaps

- `ping_google`: Alert Google that you've updated a model.

```
def save(self, *args, **kwargs):
    try:
        ping_google()
    except Exception:
        pass
```

Summary

- ★ Django is a tried and tested tool for Content Management
- ★ Excellent internal tools like ORM, Auth, Admin
- ★ But can be as lightweight as you want.
- ★ More flexible than other common CMSs.
- ★ Easy to get started.
